

Dropline OD Login & Offer Guide (Prototype RAG Knowledge Base)

This document is written for customers using a prototype Unsecured Dropline Overdraft (OD) web application. It explains the login page and offer page in simple language. It is intended to be used as part of a Retrieval-Augmented Generation (RAG) chatbot knowledge base. Internal credit assessment, underwriting, risk scoring and offer generation logic are intentionally excluded.

1. Login Page

The login page is the secure entry point to the application. Customers use it to access their pre-approved Dropline OD journey.

Customer ID / User ID

A unique identifier issued for your account. Enter it exactly as provided. It is used only to identify your account during sign in.

Password

Your confidential password used together with your Customer ID. Never share your password with anyone. Choose a strong password and change it periodically if supported.

CAPTCHA

A security verification that helps prevent automated login attempts by bots. Complete the CAPTCHA exactly as displayed.

Login Button

After entering valid credentials, select Login. If a pre-approved Dropline OD offer is available, the application takes you to the welcome page. If no offer is available, the application may display an informational message depending on the business workflow.

Forgot Password

Use this option if you cannot remember your password. Follow the guided password reset process using the registered contact information.

Security Tips

- Never share your password or OTP.
- Always log in through the official application.
- Log out after completing your session, especially on shared devices.

2. Welcome Page

The welcome page introduces the Dropline OD product and explains its key benefits. It is designed to help first-time users understand the facility before proceeding.

Main Benefits Displayed

- Paperless digital journey.
- Quick online acceptance.
- Interest charged only on the utilized amount.
- Flexible access to working capital.
- Unsecured facility (prototype).

Account Selection

If prompted, choose the account through which the facility will operate (for example, Current Account or Savings Account depending on the prototype design). After selecting the account, continue to the offer page.

3. Offer Page

The offer page displays the commercial terms of the approved Dropline OD facility. Customers should review every field carefully before continuing.

Application Number

A unique reference number for the application. Use this number whenever referring to the application.

Sanctioned Limit

The maximum credit limit approved under the facility. In this prototype the limit may be shown up to ■50 Lakhs.

Interest Rate

Fixed at 13.9% per annum in this prototype. Interest is charged only on the amount actually utilized, not on the entire sanctioned limit.

Processing Fee

A one-time fee of 1.9% applicable to the sanctioned facility in this prototype. The fee is disclosed before acceptance for transparency.

Tenure

The overall duration of the facility. In this prototype the tenure is 36 months (3 years).

Facility Validity

The offer remains active for one year. Before the validity period ends, the facility may require renewal according to the product terms.

Repayment Structure

Reducing Dropline. The maximum drawable limit reduces according to a predefined schedule during the tenure.

KFS

The Key Fact Statement summarises the important commercial terms such as interest rate, fees, tenure, repayment structure and important customer obligations.

Continue Button

Confirms that you have reviewed the offer and wish to proceed to the document review and e-sign process.

4. Understanding the Commercial Terms

Interest Rate

The annual interest rate for this prototype is fixed at 13.9% per annum. Interest is calculated only on the amount you actually use. If you do not use the sanctioned facility, interest is not charged on the unused portion.

Processing Fee

The processing fee is a one-time charge of 1.9% of the sanctioned amount in this prototype. The fee covers processing and setup of the facility according to the product design.

Tenure

The tenure is 36 months. This represents the overall duration of the Dropline OD facility from activation until the scheduled end of the product term.

Facility Validity

The facility validity is one year. This indicates the period for which the current approval remains active before any renewal or review process, if applicable under the product rules.

Reducing Dropline Structure

A reducing dropline means that the maximum amount available for withdrawal decreases over time according to the agreed schedule. This reduction applies to the approved drawing limit. Customers should ensure that outstanding utilization remains within the available limit shown on the dashboard.

5. Frequently Asked Questions

Q: Why should I read the KFS?

A: The KFS explains the important commercial terms in a concise format before you accept the offer.

Q: Can I change the sanctioned amount?

A: No. The sanctioned amount shown on the offer page is the approved offer for this prototype.

Q: Do I pay interest on the entire sanctioned limit?

A: No. Interest is charged only on the amount utilized.

Q: What happens after I click Continue?

A: You will proceed to document review and the e-sign process.

Q: Can the chatbot explain every field?

A: Yes. The chatbot can explain any customer-facing field or document in simple language.

6. Out of Scope

The chatbot must not explain or disclose internal credit assessment, underwriting policies, eligibility algorithms, risk scoring models, offer generation logic or any confidential banking process.
