

Dropline OD OTP, E-Sign, Sanction Letter & Dashboard Guide (Prototype)

This customer guide is intended for the prototype Dropline OD application and can be used as a RAG knowledge document. It explains customer-facing features only. It does not include internal approval logic, underwriting, credit assessment, or confidential bank processes.

1. OTP Verification

OTP (One-Time Password) is a temporary security code used to verify that the person accepting the facility is authorised to do so. In this prototype, the OTP is sent to the customer's registered email address. The OTP is valid only for a limited time and should never be shared.

Steps

- Enter Aadhaar number (prototype input).
- Click 'Request OTP'.
- Check your registered email.
- Enter the OTP.
- Click Verify OTP.
- Proceed to E-sign after successful verification.

If OTP is not received

- Wait a few minutes.
- Check spam/junk folder.
- Use 'Resend OTP' if available.
- Verify that the registered email address is correct.

2. E-Sign Guide

E-sign is the electronic acceptance of the facility agreement. It replaces a physical signature and records the customer's acceptance of the offer and terms. Customers should review the KFS and MITC before completing e-sign.

What happens after E-sign?

After successful OTP verification and e-sign, the application marks the offer as accepted. The facility becomes active according to the prototype workflow, and the customer can access the dashboard and download the sanction letter.

3. Sanction Letter

The sanction letter is the official document confirming the approved Dropline OD facility. Customers should download and retain it for future reference.

Typical information included

- Application number
- Sanctioned limit
- Interest rate

- Processing fee
- Tenure
- Facility validity
- Repayment structure
- Date of sanction
- Customer declarations and acceptance

4. Dashboard Guide

The dashboard is the central place to monitor the Dropline OD facility after activation.

Sanctioned Limit

The maximum approved facility amount at the time of sanction.

Available Limit

The amount that can currently be withdrawn. This may reduce over time according to the dropline schedule and will also reduce when funds are utilised.

Utilised Amount

The amount already drawn from the facility.

Interest Accrued

Interest accumulated on the utilised amount up to the latest calculation date. Interest is not charged on the unused portion of the sanctioned limit.

Days Elapsed

Number of days since the facility was activated. This helps customers understand the facility timeline.

Interest Calculated Up To

The latest date up to which interest has been calculated.

Next Interest Debit Date

The scheduled date on which accrued interest is expected to be debited according to the product terms.

Repayment Structure

Displays that the product follows a reducing dropline structure. Customers can also view the repayment schedule.

Renewal Status

Shows whether the facility is active and when renewal may be due.

Download Sanction Letter

Allows the customer to download the official sanction letter PDF.

Repay / Close Facility

Allows the customer to repay outstanding dues and request closure of the facility according to applicable product rules.

5. Frequently Asked Questions

Q: Why has my available limit reduced?

A: The available limit may reduce because funds have been utilised or because the product follows a reducing dropline schedule.

Q: Why am I paying interest?

A: Interest is charged only on the amount utilised from the facility.

Q: Can I download my sanction letter again?

A: Yes, the dashboard provides access to the sanction letter after activation.

Q: Can I close the facility early?

A: The prototype includes a repay/close option. Any applicable conditions should be shown before confirmation.

Q: What should I do before e-sign?

A: Review the KFS, MITC and offer details carefully.

6. Chatbot Scope

The chatbot can explain OTP verification, E-sign, KFS, MITC, sanction letter, dashboard metrics, interest methodology, repayment structure, renewal concepts and common customer questions. It must not answer questions about internal approval decisions, credit assessment, or customer-specific confidential information.
