

Dropline OD Renewal & Facility Closure Guide (Prototype)

This document is a customer-facing knowledge guide for a prototype Unsecured Dropline Overdraft (OD) application. It is designed for use in a Retrieval-Augmented Generation (RAG) chatbot. It explains renewal and facility closure from the customer's perspective. It intentionally excludes confidential bank processes such as internal credit assessment, underwriting, risk models, offer generation logic or approval criteria.

1. What is Facility Renewal?

The facility validity in this prototype is one year. Before the validity period ends, the customer may be invited to renew the facility. Renewal allows the customer to continue using the Dropline OD after the current validity period, subject to the lender's renewal process. Renewal is different from the overall product tenure. In this prototype, the tenure is 36 months while the facility validity is one year.

Tenure vs Validity

Tenure (36 Months) is the planned life of the Dropline OD product.

Facility Validity (1 Year) is the operational period before a renewal or review is required. Renewal helps keep the facility active for continued use.

2. Why is Renewal Important?

- Allows continued access to the facility.
- Confirms that customer details remain current.
- Provides an opportunity to review product terms if required.
- Helps ensure uninterrupted use of the approved facility.

3. Renewal Journey in the Prototype

Step 1: Dashboard displays 'Renewal Due Soon'.

Step 2: Customer selects 'Renew Facility'.

Step 3: Customer reviews the latest KFS and MITC.

Step 4: Customer confirms contact details.

Step 5: Customer reviews the existing facility summary.

Step 6: Customer accepts the renewal declaration.

Step 7: OTP verification is completed.

Step 8: Customer completes E-sign.

Step 9: Renewal confirmation is displayed and updated documents become available.

4. Information Shown During Renewal

- Application Number
- Current Sanctioned Limit
- Interest Rate
- Processing Fee (if applicable)

- Facility Validity
- Repayment Structure
- Renewal Date
- KFS
- MITC

5. Frequently Asked Questions About Renewal

Q: When should I renew my facility?

A: Renew before the displayed validity expiry date to avoid interruption of the facility.

Q: Will I receive a reminder?

A: The dashboard can display renewal reminders and notifications in this prototype.

Q: Do I need to read the KFS again?

A: Yes. Review the latest KFS before accepting the renewal.

Q: Why do I need OTP and E-sign again?

A: They confirm your identity and acceptance of the renewal terms.

Q: Can the chatbot explain renewal?

A: Yes. It can explain the customer-facing renewal process and documents.

6. What is Facility Closure?

Facility closure means permanently ending the Dropline OD agreement. After closure, the customer can no longer draw funds using that facility. Closure is normally requested after outstanding dues have been settled according to the applicable product terms.

7. Customer-Initiated Closure Journey

Step 1: Open the Dashboard.

Step 2: Select 'Repay / Close Facility'.

Step 3: Review the outstanding balance and accrued interest.

Step 4: Confirm repayment details.

Step 5: Read the closure declaration.

Step 6: Complete OTP verification if required.

Step 7: Complete E-sign for the closure request if applicable.

Step 8: Receive closure confirmation.

Step 9: Download the closure acknowledgement, if provided.

8. Before Requesting Closure

- Review your outstanding utilised amount.
- Review accrued interest up to the latest calculation date.
- Download important documents such as the sanction letter if required.

- Ensure you understand that no further withdrawals will be available after closure.

9. Dashboard Messages the Chatbot Can Explain

Renewal Due Soon

Your facility validity is approaching expiry. Review the renewal information.

Renewal Completed

Your renewal request has been successfully completed.

Closure Requested

Your request to close the facility has been submitted.

Facility Closed

The Dropline OD facility is no longer active and further withdrawals are unavailable.

10. Common Customer Questions

Q: What is the difference between renewal and closure?

A: Renewal keeps the facility active. Closure permanently ends the facility.

Q: Can I use the facility after closure?

A: No. Once the facility is closed, new withdrawals are not available.

Q: Can I cancel a closure request?

A: The prototype may allow cancellation only until final confirmation, depending on the implemented workflow.

Q: Will my dashboard change after closure?

A: The dashboard can display the facility as closed while preserving historical information.

11. Chatbot Scope

The chatbot should explain renewal, closure, OTP, E-sign, KFS, MITC, dashboard messages, product terminology and customer actions. It must not explain or disclose internal approval decisions, credit assessment methods, renewal decision criteria, underwriting logic or confidential customer information.
