

Dropline OD Prototype - Situation-Based Customer Conversations for RAG

This document contains realistic customer situations designed for a prototype Dropline OD assistant. These conversations are customer-facing only and avoid internal credit assessment, underwriting, eligibility logic or customer-specific data. They are intended to improve Retrieval-Augmented Generation (RAG) performance.

Customer Conversations

Scenario 1

Customer: I forgot my password.

Assistant: Use the 'Forgot Password' option on the login page. Follow the on-screen instructions to reset your password using your registered contact details.

Scenario 2

Customer: My password is incorrect.

Assistant: Check for typing errors, ensure Caps Lock is off, and try again. If you still cannot log in, use 'Forgot Password'.

Scenario 3

Customer: I cannot log in.

Assistant: Verify your Customer ID, password and CAPTCHA. If the issue continues, reset your password or contact your bank's official support.

Scenario 4

Customer: What is a Dropline OD?

Assistant: A Dropline OD is a revolving working-capital facility where the available drawing limit gradually reduces according to a predefined schedule.

Scenario 5

Customer: Why do I have a pre-approved offer?

Assistant: A pre-approved offer is available in your account. The chatbot cannot explain how the offer was generated because internal assessment processes are confidential.

Scenario 6

Customer: What is the sanctioned limit?

Assistant: The sanctioned limit is the maximum credit facility approved for your Dropline OD.

Scenario 7

Customer: What is the available limit?

Assistant: The available limit is the amount you can currently withdraw. It changes based on utilisation and the reducing dropline schedule.

Scenario 8

Customer: Why has my available limit reduced?

Assistant: The available limit may reduce because you have utilised part of the facility or because the product follows a reducing dropline schedule over time.

Scenario 9

Customer: Do I pay interest on the full sanctioned amount?

Assistant: No. Interest is charged only on the amount you actually utilise.

Scenario 10

Customer: What does 13.9% p.a. mean?

Assistant: It is the annual interest rate used for this prototype. Interest is applied only to the utilised amount.

Scenario 11

Customer: What is the processing fee?

Assistant: It is a one-time fee charged during setup of the facility. In this prototype it is 1.9% of the sanctioned amount.

Scenario 12

Customer: What is tenure?

Assistant: The tenure is the overall duration of the facility, which is 36 months in this prototype.

Scenario 13

Customer: What is validity?

Assistant: Validity refers to the current approval period before renewal. In this prototype, the validity is one year.

Scenario 14

Customer: Why should I read the KFS?

Assistant: The Key Fact Statement summarises the most important commercial terms of the facility in a clear and simple format.

Scenario 15

Customer: What is MITC?

Assistant: MITC stands for Most Important Terms & Conditions. It explains your responsibilities and the important operating conditions of the facility.

Scenario 16

Customer: I don't understand reducing dropline.

Assistant: It means the maximum amount you can draw reduces gradually according to the agreed schedule. The chatbot can explain this with examples.

Scenario 17

Customer: How do I continue after reviewing the offer?

Assistant: Click 'Continue' to proceed to document review and the OTP/e-sign process.

Scenario 18

Customer: OTP not received.

Assistant: Wait a few minutes, check your spam folder, then use 'Resend OTP' if available.

Scenario 19

Customer: OTP expired.

Assistant: Request a new OTP and enter the latest code.

Scenario 20

Customer: OTP is incorrect.

Assistant: Ensure you entered the latest OTP exactly as received. If necessary, request another OTP.

Scenario 21

Customer: Why do I need OTP?

Assistant: OTP helps verify that the person accepting the offer is authorised to do so.

Scenario 22

Customer: What is e-sign?

Assistant: E-sign is the electronic acceptance of the agreement, replacing a handwritten signature in this prototype.

Scenario 23

Customer: What happens after e-sign?

Assistant: Once e-sign is completed successfully, the facility is activated according to the prototype workflow.

Scenario 24

Customer: Can I download the sanction letter?

Assistant: Yes. After activation, you can download the sanction letter from the dashboard.

Scenario 25

Customer: Where can I see my interest?

Assistant: The dashboard displays the accrued interest and the date up to which it has been calculated.

Scenario 26

Customer: What is 'Interest Calculated Up To'?

Assistant: It is the latest date up to which interest has been computed.

Scenario 27

Customer: What is 'Next Interest Debit Date'?

Assistant: It is the scheduled date on which accrued interest is expected to be debited according to the product terms.

Scenario 28

Customer: What are 'Days Elapsed'?

Assistant: This shows how many days have passed since the facility became active.

Scenario 29

Customer: How do I renew my facility?

Assistant: Open the dashboard, select 'Renew Facility' when available, review the documents, complete OTP verification and e-sign if required.

Scenario 30

Customer: Can I close my facility?

Assistant: Use the 'Repay / Close Facility' option from the dashboard. Review the details before confirming.

Scenario 31

Customer: Can you explain every page?

Assistant: Yes. The chatbot can explain every customer-facing page, field, button and document used in the application.

Scenario 32

Customer: Can you tell me why my limit is ₹25 Lakhs?

Assistant: No. The chatbot cannot explain internal assessment or offer generation logic.

Scenario 33

Customer: Can you access my account?

Assistant: No. This chatbot only provides product guidance and does not access customer account information.

Scenario 34

Customer: Can I ask questions in Telugu or Hindi?

Assistant: Yes. The chatbot supports multiple languages and responds in the language you use.

Scenario 35

Customer: I forgot my password.

Assistant: Use the 'Forgot Password' option on the login page. Follow the on-screen instructions to reset your password using your registered contact details.

Scenario 36

Customer: My password is incorrect.

Assistant: Check for typing errors, ensure Caps Lock is off, and try again. If you still cannot log in, use 'Forgot Password'.

Scenario 37

Customer: I cannot log in.

Assistant: Verify your Customer ID, password and CAPTCHA. If the issue continues, reset your password or contact your bank's official support.

Scenario 38

Customer: What is a Dropline OD?

Assistant: A Dropline OD is a revolving working-capital facility where the available drawing limit gradually reduces according to a predefined schedule.

Scenario 39

Customer: Why do I have a pre-approved offer?

Assistant: A pre-approved offer is available in your account. The chatbot cannot explain how the offer was generated because internal assessment processes are confidential.

Scenario 40

Customer: What is the sanctioned limit?

Assistant: The sanctioned limit is the maximum credit facility approved for your Dropline OD.

Scenario 41

Customer: What is the available limit?

Assistant: The available limit is the amount you can currently withdraw. It changes based on utilisation and the reducing dropline schedule.

Scenario 42

Customer: Why has my available limit reduced?

Assistant: The available limit may reduce because you have utilised part of the facility or because the product follows a reducing dropline schedule over time.

Scenario 43

Customer: Do I pay interest on the full sanctioned amount?

Assistant: No. Interest is charged only on the amount you actually utilise.

Scenario 44

Customer: What does 13.9% p.a. mean?

Assistant: It is the annual interest rate used for this prototype. Interest is applied only to the utilised amount.

Scenario 45

Customer: What is the processing fee?

Assistant: It is a one-time fee charged during setup of the facility. In this prototype it is 1.9% of the sanctioned amount.

Scenario 46

Customer: What is tenure?

Assistant: The tenure is the overall duration of the facility, which is 36 months in this prototype.

Scenario 47

Customer: What is validity?

Assistant: Validity refers to the current approval period before renewal. In this prototype, the validity is one year.

Scenario 48

Customer: Why should I read the KFS?

Assistant: The Key Fact Statement summarises the most important commercial terms of the facility in a clear and simple format.

Scenario 49

Customer: What is MITC?

Assistant: MITC stands for Most Important Terms & Conditions. It explains your responsibilities and the important operating conditions of the facility.

Scenario 50

Customer: I don't understand reducing dropline.

Assistant: It means the maximum amount you can draw reduces gradually according to the agreed schedule. The chatbot can explain this with examples.

Scenario 51

Customer: How do I continue after reviewing the offer?

Assistant: Click 'Continue' to proceed to document review and the OTP/e-sign process.

Scenario 52

Customer: OTP not received.

Assistant: Wait a few minutes, check your spam folder, then use 'Resend OTP' if available.

Scenario 53

Customer: OTP expired.

Assistant: Request a new OTP and enter the latest code.

Scenario 54

Customer: OTP is incorrect.

Assistant: Ensure you entered the latest OTP exactly as received. If necessary, request another OTP.

Scenario 55

Customer: Why do I need OTP?

Assistant: OTP helps verify that the person accepting the offer is authorised to do so.

Scenario 56

Customer: What is e-sign?

Assistant: E-sign is the electronic acceptance of the agreement, replacing a handwritten signature in this prototype.

Scenario 57

Customer: What happens after e-sign?

Assistant: Once e-sign is completed successfully, the facility is activated according to the prototype workflow.

Scenario 58

Customer: Can I download the sanction letter?

Assistant: Yes. After activation, you can download the sanction letter from the dashboard.

Scenario 59

Customer: Where can I see my interest?

Assistant: The dashboard displays the accrued interest and the date up to which it has been calculated.

Scenario 60

Customer: What is 'Interest Calculated Up To'?

Assistant: It is the latest date up to which interest has been computed.

Scenario 61

Customer: What is 'Next Interest Debit Date'?

Assistant: It is the scheduled date on which accrued interest is expected to be debited according to the product terms.

Scenario 62

Customer: What are 'Days Elapsed'?

Assistant: This shows how many days have passed since the facility became active.

Scenario 63

Customer: How do I renew my facility?

Assistant: Open the dashboard, select 'Renew Facility' when available, review the documents, complete OTP verification and e-sign if required.

Scenario 64

Customer: Can I close my facility?

Assistant: Use the 'Repay / Close Facility' option from the dashboard. Review the details before confirming.

Scenario 65

Customer: Can you explain every page?

Assistant: Yes. The chatbot can explain every customer-facing page, field, button and document used in the application.

Scenario 66

Customer: Can you tell me why my limit is ₹25 Lakhs?

Assistant: No. The chatbot cannot explain internal assessment or offer generation logic.

Scenario 67

Customer: Can you access my account?

Assistant: No. This chatbot only provides product guidance and does not access customer account information.

Scenario 68

Customer: Can I ask questions in Telugu or Hindi?

Assistant: Yes. The chatbot supports multiple languages and responds in the language you use.

Scenario 69

Customer: I forgot my password.

Assistant: Use the 'Forgot Password' option on the login page. Follow the on-screen instructions to reset your password using your registered contact details.

Scenario 70

Customer: My password is incorrect.

Assistant: Check for typing errors, ensure Caps Lock is off, and try again. If you still cannot log in, use 'Forgot Password'.

Scenario 71

Customer: I cannot log in.

Assistant: Verify your Customer ID, password and CAPTCHA. If the issue continues, reset your password or contact your bank's official support.

Scenario 72

Customer: What is a Dropline OD?

Assistant: A Dropline OD is a revolving working-capital facility where the available drawing limit gradually reduces according to a predefined schedule.

Scenario 73

Customer: Why do I have a pre-approved offer?

Assistant: A pre-approved offer is available in your account. The chatbot cannot explain how the offer was generated because internal assessment processes are confidential.

Scenario 74

Customer: What is the sanctioned limit?

Assistant: The sanctioned limit is the maximum credit facility approved for your Dropline OD.

Scenario 75

Customer: What is the available limit?

Assistant: The available limit is the amount you can currently withdraw. It changes based on utilisation and the reducing dropline schedule.

Scenario 76

Customer: Why has my available limit reduced?

Assistant: The available limit may reduce because you have utilised part of the facility or because the product follows a reducing dropline schedule over time.

Scenario 77

Customer: Do I pay interest on the full sanctioned amount?
